

REDUCING EFFECTS OF TRANSMISSION LINE REFLECTIONS

Michael H. Badger

ABSTRACT OF THE DISCLOSURE

5 A system and method of reducing an effect of signal distortion from reflection on a transmission line include changing at least one of a pedestal voltage level on the transmission line and a signal threshold voltage level in a processor coupled to the transmission line, such that the pedestal voltage level and the signal threshold voltage level are not substantially equal after the changing, and such that the effect of signal distortion from reflection on the transmission line is reduced.
